

PRESS RELEASE

Liberty Europe Offers Internet Café Service to Property Owners

Date: 3rd October 2005

Liberty Europe Network Limited, a UK based company that provides high-speed Wireless Internet Access solutions currently to public venues such as Hotels, Conference Centres and also to Residential customers, are launching their innovative new package to property owners enabling them to set up their own Internet Café.

The pre-packaged Internet Café services include the full supply and installation of PC's, installation of network, high-speed connection to the Internet and payment schemes. Liberty Europe will also offer ongoing maintenance on all hardware, billing services, and authentication services to run the Internet Café. The increasingly popular VSP (Venue Support Programme™) will also be included in the package, items include:-

- **After Sales Marketing Support**
 - Starter Pack (FREE)
 - Development of captive portal
 - Easy replacement orders for vouchers, brochures, tent cards, and trouble shooting guide
 - Personal Account Manager
 - Website assessment, review and recommendation
 - A comprehensive package of sales-boosting initiatives
- **Staff Training**
- **Network Usage Monitoring and Reporting**

“Our New Internet Café Complete Package” says Liberty Europe CEO Barry Shrier “will allow any property owner, like a small hotel, café, B & B etc, to profit from selling Internet access to their customers. It will also increase the number of customers that the property gets; people will seek out and visit the property more often”.

About Liberty Europe

Liberty Europe Network was formed in 2002 by CEO Barry Shrier to address the growing demand for more convenient, fast access to the Internet and the benefits that such a service would provide. In response to market opportunities, this new group of businesses was formed in the Public Access Wireless Internet Sector across Europe.

For further information on how you can set up your own Internet Café, please contact Kimberley Rennie on:-
